

Auphonic Settings Cheat Sheet

The exact settings I use for every episode. Save this as a preset called "Edge Within Standard" in Auphonic so you never have to re-enter it.

Adaptive Leveler

Setting	Value
Adaptive Leveler	On
Mode	Default Leveler
Leveler Strength	100% (Default)
Compressor	Auto

Filtering

Setting	Value
Filtering	On
Filtering Method	Voice AutoEQ

Loudness Normalization

Setting	Value
Loudness Normalization	On
Loudness Target	-16 LUFS (Podcasts and Mobile)
Maximum Peak Level	Auto
Dual Mono	Off
Normalization Method	Dialog Loudness

Noise Reduction

Setting	Value
---------	-------

Noise Reduction	On
Denoising Method	Speech Isolation (keep speech, remove everything else)
Remove Noise	100 dB (full)
Remove Reverb	100 dB (full)
Remove Breathings	Off

Automatic Cutting

Setting	Value
Automatic Cutting	Off

How I use it

I upload the raw audio to Auphonic, apply this preset, and export. I don't tweak it episode to episode, the same settings work whether the conversation was calm or loud, in a studio or outside in a garden. Consistency in editing matters more than chasing perfect settings for every single recording.

Don't overthink this part. You'll improve as you go, this is a starting point, not a rulebook.
